

CROWN SAVER

Reliable protection where it counts - at the crown.
Install on any coring, service, or drilling rig.

Protect your crews and equipment.

RIG SMART™
SYSTEMS

RIGSMART CROWN SAVER

- Rugged wireless design means no cables on the derrick
- No need to calibrate, reset or reactivate the system on startup or after a 'slip and cut'
- Will apply the rig brakes or stop a hydraulic winch, depending on the rig type
- By-pass function allows for 30 seconds of deactivation for BHA assembly, pulling long rods, etc
- System runs constant health checks and is fail-safe in design
- Floor height can be changed quickly and easily
- Can be installed on any coring rig, service rig or drilling rig
- Meets all site requirements
